

Curriculum  
sheets

Education Program Choices  
Onsite and Offsite

Ways of the  
Wolf

**Ways of the Wolf (Grades 3-5)** What does it take to survive in the wild? Learn how wolves survive their habitat by understanding the four main components of any creature's habitat and how wolves use their sense to help them. Through hands-on activities, see if you could survive the challenges of wolves in the wild.

Wolf Café

**Wolf Café (Grades 3-5)** What's on the menu at the wolf café? Study how the roles of predator/prey species are determined by their adaptations and survival strategy while examining skulls, antlers and horns.

Vanishing  
Creatures

**Vanishing Creatures (Grades 6-8)** Find out what makes an animal more susceptible to becoming endangered or extinct. Work together to determine why an animal might become endangered. Learn what you can do to help endangered species make a comeback.

Wolves in the  
Ecosystem

**Wolves in the Ecosystem (Grades 6-8)** Learn about the wolf's role in its ecosystem as an apex predator.

**World of Wolves (Grades 6-8, 9-12+, Adults)** A brief glimpse at the behavior, physical characteristics, and social structure that make the wolf such a unique animal.

**Wolves of Washington (9-12+, Adults)** After an almost 70-year absence, wolves have returned to Washington. Where are they and how are they surviving? How are they affecting the people who live in Washington? Learn all this and more during this Washington-focused program.

**Wolf Recovery (Adults)** What happened to the wolf and its habitat? What is Wolf Haven doing to help the wolf along in its recovery? Come learn about the challenges and successes of recovery plans for the gray wolf, red wolf, and Mexican gray wolf.

Onsite only

**Animal Care at Wolf Haven (6-8, 9-12+)** Take a look at how the wolves of Wolf Haven are cared for. Where do the Wolf Haven wolves come from? Learn about our philosophy regarding feeding and daily care. Presentation includes the challenges of managing a wild animal in captivity and the handling of veterinary emergencies.

**Prairie program (3-5, 6-8, 9-12+)** Discover, in-depth, the wonders of our endangered Mima mound prairie.

## Offsite only

### Ways of the Wolf

**Ways of the Wolf (Grades 3-5)** What does it take to survive in the wild? Learn how wolves survive their habitat by understanding the four main components of any creature's habitat and how wolves use their senses to help them. Through hands-on activities, see if you could survive the challenges of wolves in the wild.

### Den Digs

**Den Digs (K-2)** All animals have a habitat. Through hands-on activities, learn about the four components of wolf habitat: food, water, shelter, and natural environment. See if you could survive the challenges of wolves in the wild.

### Wolf Sense

**Wolf Sense (K-2)** What does a wolf see, smell, hear, taste, and feel? Learn about a wolf's senses and how they are both similar and different from your own. Lots of fun hands-on activities.
